

BlueAlpha Current Task Checklist

BlueAlpha MMM Team

April 21, 2026

How To Use

- Mark each checkbox as work is completed.
- Keep owner and due date fields updated in your team workflow tool.
- Use the acceptance criteria as the definition of done for each task.

1) End-to-End Pipeline For Any Dataset

Owner: _____ **Due Date (Suggested): 2026-04-24**

- ☐ Validate minimum input contract across time/KPI/channel columns.
- ☐ Add clear schema error messages for missing required columns.
- ☐ Support flexible dataset onboarding without code edits.
- ☐ Add at least one smoke test using a non-Mocha dataset.

Acceptance Criteria

- ☐ New dataset runs through pipeline from config to dashboard without manual code changes.
- ☐ Failures are actionable (explicit missing columns/format guidance).

2) New Mu Strategy + Sigma Testing Plan

Owner: _____ **Due Date (Suggested): 2026-04-25**

- ☐ Replace multiplier-only behavior with explicit mu range mode (start/end/step).
- ☐ Set default mu sweep to 0.5 to 3.0 by 0.5.
- ☐ Set sigma sweep to [0.5, 1.0, 1.5] for default runs (lighter compute).
- ☐ Only add 2.0 as an extra sigma point if results are still unstable.
- ☐ Keep one clear baseline rule and document it in config.

Acceptance Criteria

- ☐ Config supports explicit mu/sigma ranges and runs successfully.
- ☐ Mu/Sigma defaults are fixed and shared with the team.
- ☐ Baseline mu selection rule is explicit and reproducible.

3) Channel Interaction Sensitivity (1-Channel, 2-Channel, ...)

Owner: _____ **Due Date (Suggested): 2026-04-27**

- ☐ Add experiment modes for one-channel perturbation.
- ☐ Add experiment modes for two-channel joint perturbation.
- ☐ Add experiment modes for three-or-more linked target perturbation.
- ☐ Add comparison outputs showing how behavior changes by interaction size.

Acceptance Criteria

- ☐ Report/dashboard clearly separates single vs paired vs grouped perturbation effects.
- ☐ Output tables include run metadata for interaction mode.

4) Robustness Score Guideline In Dashboard

Owner: _____ **Due Date (Suggested): 2026-04-28**

- ☐ Show one simple robustness score block: score + band (Low/Medium/High).
- ☐ Add short interpretation text: Green = use, Yellow = caution, Red = rerun.
- ☐ Keep only key source info (score file + run count).

Acceptance Criteria

- ☐ Non-technical user can understand robustness result in 10 seconds.

5) Team Dashboard Graph Keep/Remove Review

Owner: _____ **Due Date (Suggested): 2026-04-29 (meeting day)**

- ☐ Inventory all current dashboard charts/cards.
- ☐ Review each chart for decision value, clarity, and redundancy.
- ☐ Mark each chart as Keep, Revise, or Remove.
- ☐ Publish final “Dashboard v1 Graph Set” list.

Acceptance Criteria

- ☐ Team-approved keep/remove decisions are documented.
- ☐ Dashboard template/config updated to match approved set.
